SKILLS

Frontend: Javascript, TypeScript, React.js, Next.js, Tailwind CSS, Shadcn UI

Backend & Real-Time: Express.js, Socket.io, REST APIs

Databases & Tools: MongoDB, Mongoose, Git, GitHub

PROJECTS

Chatify :

Full-stack, real-time chat application enabling instant messaging plus text/voice calls with an AI character powered by Google Gemini.

- Real-Time Chat: Instant messaging built with Socket.io
- AI Integration: Chat and voice calls with AI characters using the Gemini API
- Media Sharing: In-chat image sharing via Cloudinary
- **Tech Stack:** React, Vite, Redux Toolkit, Three.js, Socket.io-client, Node.js, Express.js, MongoDB, Gemini API, Cloudinary

Mestry Message :

Full-stack anonymous messaging app that gives users a unique public link to securely receive anonymous feedback and messages.

- Anonymous Messaging: Personalized public link lets anyone send anonymous messages to the user
- AI Message Suggestions: AI integration auto-suggests creative message ideas for senders
- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, Shadcn UI, NextAuth, MongoDB, Resend API

LiveDocs :

Real-time collaborative document editor, similar to Google Docs, supporting simultaneous multi-user editing, invites, and comments.

- Real-Time Collaboration: Powered by Liveblocks, allowing multiple users to view, edit, and collaborate on the same document simultaneously
- **Tech Stack:** Built with Next.js, TypeScript, and Shadcn UI for the frontend, powered by MongoDB and Liveblocks for real-time backend operations and BetterAuth for authentication.
